

# Perisher

(Australia)

Perisher is Australia's most popular snow holiday destination with seven mountain peaks and 47 lifts servicing 12.45sq kms acres of skiable terrain.

Located in the picturesque Kosciuszko National Park in South Eastern NSW, its vast expanse makes it the Southern Hemisphere's biggest alpine resort. Its varied terrain is suitable for all ages and ability levels from first timers to experts.

Perisher was interested in making improvements that increased the perception of the resort as being contemporary and technically savvy.

# Perisher

(Australia)

Latest solution  
for mountain  
destinations:

Installation Date	Spring 2011
# of POS	150 in use
Number of SKIDATA Coders	65
POS Software	RTP ONE
Access Software	RTP ONE
Access Gates	72 Freemotion.Gate 'Basic'
Data Carriers	RFID keycard, keytix 'light'

In 2011, Perisher embarked on several initiatives to accomplish these goals:

- Make it easier for guests to move about the resort and go directly to the lift
- Reduce fraud
- Create a pleasant surprise for guests with new technology
- Create a way for guests to make advanced purchased online and through reloading RFID media

To accomplish these goals, Perisher added SKIDATA RFID access control to the RTP|ONE ticketing and POS solution already in place. Thus, Perisher can now offer innovative multi-day products.

Furthermore, by adding 72 Freemotion.Gates 'Basic' with RFID ticketing, guests now have the ability to access the mountain directly without stopping at a lift ticket office.

## Special Features

- Allows full-mountain and train access
- Provides ability to offer innovative multi-day products
- Implemented RFID to also help keep that competitive edge with other AU resort competitors
- Reduces fraud with the integration between the POS system and access control mechanism
